

PUBLICATION/NEWSLETTER/STAYS

PUBLICATION

On the score of publications, I've had a fairly good return so far, though some countries or individuals haven't sent me anything which is a pity. Therefore I renew my request so the list of publication can be kept up to date. It is already available on the web site where you should be able to find two lists, one named PARTNALADIN, the other, RECAPGMAP. Some publications will be found in both lists because RECAPGMAP is also used by the CNRM. PARTNALADIN is divided into four parts:

- 1 - International Publications with reviewing committee
- 2 - Other Publications without reviewing committee:(besides seminars/workshops etc...)
- 3 - Presentation during a seminar/workshop/proceedings etc...
- 4 - Rapport de stage (Report during stays)

Don't forget to let me know inside which part your publication falls.

NEWSLETTER

It has been felt necessary to simplify the editorial job of the Newsletter and at the same time to make it more accessible, more quickly.

As the new editor, I've introduced some minor changes to the Newsletter, amongst which the systematic use of two style sheets. For oncoming Newsletters, you are kindly invited to use them. It goes without saying that remarks and suggestions are welcome. Style sheets will shortly be available on the web site. From now on, deadline for the Newsletter are 22 of July and 22 of January. The only date you have to remember is the 22 of January, because it's MY BIRTHDAY, then 6 months later. Don't wait till the last moment to send me your contributions. However, I will send you reminders in due course. About the style sheets, one is called Report and should only be used for reports, the other is called ARTICLE and should be used for everything else. The front page of the REPORT style sheet is next page.

How to use the REPORT style sheet

Use the window left hand corner bottom line APPLY SHEET STYLE.

For the title use HEAD TITLE.

For each headings use TITLE 1.

For each sub headings use TITLE 2, sub sub heading TITLE 3 and so on.

For the text, BODY OF TEXT.

For Place & date, use FINAL/END FORMULAE.

In the HEAD PAGE, after Place & date Toulouse date ... (Final/end formulae)

You will find, Part 1: Geometry, Orography, Climatology, Initial conditions

If this part doesn't apply to your article, click on it and CHOOSE the Part which fits your paper.

Try as often as possible to include figures in the text, it will save searching for different files and it will be easier to print and read.

CONTENTS will be automatically incremented. To actualize the contents, right click then actualize.

The content of the Newsletter is almost the same as past numbers, ALATNET having been dropped out. A new sub chapter called ALADIN 2 has been added as well as a new chapter, chapter 6 called PUBLICATIONS. In sub chapter 1.3. which I is, for the moment, called Gossip (a better name may be found as this chapter is as free as open) therefore don't hesitate to contribute on any topic.

As for properly called contribution and generally speaking, if the text is shortish lets say less than half a page, text will appear under the heading, otherwise a link of a sort will lead you to the appropriate paper. I'm sorry to repeat myself **BUT** in case of a long article (more than half a page), you are kindly requested to use the appropriate style sheet. Once again try as often as possible to include figures in the body of the text.

Papers will be available in 2 formats: open office and pdf. The skeleton of the Newsletter should be on line soon. If your contribution reaches me after the deadline, it will appear in the next Newsletter. The content of the Newsletter is on the last page.

To be fully efficient, the Newsletter must be edited **ON TIME**, otherwise it becomes obsolete. Needless to say that **EVERYONE** should fully contribute to make it successful.

Lastly but not least, next DEADLINE is 22d of July 2004.
