Session Reporting

- Data Assimilation and Obs: Nils / Andras
- Dynamics: Radmila / Mariano
- Physics: Laura / Francois
- System Appl. And Verif.: Maria / Ole
- Probabilistic forecasting: Jan / Jose A.
- Application / Demonstration: Jure / Xiaohua

General discussion

- Format of the meeting
  - Split of business and sience/technical
  - Parallel sessions
  - Should we have one invited lecture in plenary session (from the group? To sum up the parallel sessions by content.)
  - Post the talks before the meeting to all members?
  - Joint meetings get big. Problematic for "small" services to arrange?

General Discussion

- Purpose of ALADIN-HIRLAM Co-operation….
- One common model?
- How can we increase the number of people contributing to or experimenting with meso-scale LAM development?
- Accademia? Can the systems become easier to use?
- How should we take into account the innaccuracies in model parameters/processes?
- Are case studies really useful?
