- **Subject**: [alabobo2] gmkpack 6.6.8
- **Date**: Tue, 3 Apr 2018 11:55:07 +0200 (CEST)

Dear all,

Here is another update of gmkpack, mandatory for cycle 46.
What's new inside :
- Provisional support for projects oops_src and oopsifs
- Support for eckit, eckit_mpi and fckit libraries
- Support for boost_thread, boost_system, boost_unit_test_framework, boost_mpi and boost_serialization libraries
- update linking rules for odbtools mrgvarbc and oops binaries
- fix a bug in the recursive destruction of outdated objects, when a modified header is included inside
  a non-modified header.

This new version has been installed on MF supercomputers "beaufix" and "prolix", on the PCs of GMAP and at ECMWF on CCA.
The former version can still be used, as "gmkpack.old"

The tar file can be found on ecfs and hendrix :
ec:/rme/hirald/gmkpack/gmkpack.6.6.8.tar.gz
hendrix:/home/khatib/gmkpack/gmkpack.6.6.8.tgz

Best regards,
Ryad
